

## **BRUNO BRUNONE**

Bruno Brunone, Ph.D, is professor and director/founder of the Water Engineering Laboratory (WEL) at the University of Perugia.

He is Associate Editor of the *J. of Hydraulic Engineering* and the *J. of Water Resources Planning and Management* by ASCE.

He is president of the Water Systems Study Center (CSSI); a fellow of Int. Association for Hydro-Environment Engineering and Research (IAHR).

He was chair of Int. Conf. CCWI2013 and WDSA2014 and of the series of ten National Seminars on "Water Systems Management" that began in 2003.

Winner of the "Sustainability Award" for the Portable Pressure Wave Maker device (Int. Water Exhibition H2O, 2016 ed.) and of the EWRI JC Stevens Award (2018).

He is the author of over 350 works in international journals and in conference proceedings.

It carries out research and consultancy activities in the field of management of pressure pipeline systems with particular reference to innovative diagnostic techniques (leak search) and the simulation and control of transients.
